Subject: Fw: US Steel - Updated Violation and Remedy Tables

Over the coming weeks, I'll be working on the USS presentation based in part on the remedy tables that were previously developed by U.S. EPA. Since the tables were developed, USS sent a response to the NOV's issued to Granite City and Ecorse. After reviewing their responses, please review your remedy tables and send me updates you have (or let me know if there aren't any updates to the tables).

As for timeline, I'll be on a multimedia inspection June 14-18. There is a chance that I could get to this before I go, but at the latest, please get your remedy tables to me so I have them on 6/19 (unless I'm told there is a bigger rush on this).

Thanks,
Monica

Subject: US Steel - Updated Violation and Remedy Tables

I updated our Violation and Remedy tables for each US Steel facility. Each table lists the violations, US Steel's verbal response to us during the NOV conference, and my current thinking on a preliminary relief proposal. As you know, USS promised us a written response to the NOV's. That response will come in pieces, and we should receive the first stuff within two weeks.

So, please provide your thoughts on the format of the table, my summary of the USS response, and your general impression on relief (given that we won't take a "final" position on relief until we review the written response from them).

Thanks,
